.STATEMENT

Stevie Famulari, Gds teaches and designs public art, phytoremediation applications, storm water management, landscape architecture itstory, and specialty green courses. Her research in design explores the relationship, extension, and application of green designs to other professional fields. Stevie's PhD, ABD research is at RMIT. She received her master's degree in Landscape Architecture from SUNY College of Environmental Science and Forestry with a concentration in Fine Arts from Syracuse University. Her bachelor's degree of Fine Arts is from New York University.

Ms. Famulari's work focuses on greening designs and practices to create healthy spaces for living and working. By applying the science of phytoremediation to the art of landscape design, her works have aesthetic beauty as well as healing properties for both people and environment. Her first book on this topic, *Green Up! Sustainable Design Solutions for Healthier Work and Living Environments*, by Routledge, Taylor and Francis Group publishers, was released 2019.

Stevie's projects include greenwalls; planted roofs; green remediation designs for interior and exterior applications; water remediation designed to benefit communities near oil fracking sites; designs for the Environmental Protection Agency in Colorado, Smithsonian Arts & Industries Building, North Dakota State University, and the Ghost Ranch Visitor Center for the Georgia O'Keefe Museum in Abiquiu, New Mexico; development of green design and policies on the UNM campus; flood control design for the Red River in North Dakota; and green design on numerous residential sites nationally.

Stevie Famulari's phytoremediation database of plants that clean the air, soil, and water of contaminants has been used by the EPA, landscape architecture, and engineering firms, and government agencies. She has been an investigator for grants which explore remediation design for oil drilling processes, the improvement of air quality, remediation design for communities, and interior green applications.

Her work in greening designs, practices, research, and education can be seen nationally and internationally through awards, lectures, books, presentations, and exhibitions at Harvard University Graduate School of Design, Smithsonian, Plains Art Museum, San Diego Museum of Natural Itstory, UC Berkeley, International Phytotechnology Society, MECA, UNM, UMN, ASLA, and AIA.

Stevie's work has appeared in hundreds of books, magazines, newspapers, and television programs, including Food Network Challenges and Specials, NBC Evening News, Oakland Tribune, World Entertainment News Network, The Oprah Winfrey Show, the Travel Channel, Good Morning America, CBS Early Morning News, *Smithsonian Magazine*, *Washington Post*, *The Post Standard*, Trust for Public Land, *Boston Herald*, *Berkeley Daily Planet*, NY Village Voice, Santa Fe Reporter, and Star Tribune.

Ms. Famulari has been a professor of Landscape Architecture and Urban Design for over a decade, as well as a director, a green artist, an author, and a researcher. She is currently a professor at Farmingdale State College, the State University of New York, in the Department of Urban Horticulture and Design. She has also worked as a professor in the Department of Landscape Architecture at North Dakota State University.

Stevie Famulari is changing the way people live and work in their spaces- in any scale, interior, exterior or unique site conditions- to create healthy living spaces.

.SKILLS & EXPERTISE**Green Design**

landscape architecture, plant materials, remediation, hardscape, design & build, installation, policies, construction documents, regulations, ADA

Built projects include public & commercial sites, private residences, universities, design competitions, community workshops, lectures

Phytoremediation <http://www.steviefamulari.net/phytoremediation> searchable database of applied remediation research of air, water and soil cleaning for greening practices

Installations, Exhibitions

Built projects include museums, galleries, movie sets, movie props, public art, community events working with plants, soil, irrigation, lighting, woodwork, welding, walls, footing, irrigation, electric, fabrics, painting, faux finishes, stones, snow, power tools, lifts, cranes, construction documents, documentation of the process

Christmas Co. displays (Rockefeller Center, Saks, Radio City, interior and exterior large scale displays)

Research, Grants, Writing

grant writing, grant execution, research articles in the arts and sciences, writing for academic journals, white papers, writing for public magazines and papers

Lectures

Lectures nationally on her book *Green Up!* as well as in green art & design, phytoremediation, itstory, urban agriculture, storm water design and management, erosion control, equity in academia. Including Harvard Graduate School of Design, Conferences, ASLA Chapters, city planning department, public art committees

.PUBLIC DESIGNS, INSTALLATIONS AND EVENTS

Present-2017 Green Fashion and GreenWall for Farmingdale State College Office.

Living planted green fashion and greenwall in corner office design.

2018 3 Moments' Annual Garden for Robert F. Ench Teaching Gardens. Farmingdale State College. Design for 2018 Annual Garden. Farmingdale, NY

Present-2015 Engaging with Floating Islands Design- Collaborations with Floating Islands International for designs addressing storm water management. Engaging Green Project.

2015 Engaging the Wetland- Greening design and research for cleaning water in the oil drilling process. Collaborating with Floating Islands International, Midwest Floating Islands, John Freeman. Engaging Green Project.

2015 Feeder Design- commissioned by Appetence, Film. Creation of a movie set prop design for a short film. Film acceptance into NY and London film festivals. Engaging Green Project.

2012 Seed Bags- commissioned by the Plains Art Museum, for Social Engagement Project. Fargo, ND

2012 Phytoremediation Database- Completion of database of plants which can be used to address phytoremediation. The database, designed with student Kyla Witz, is created for use with designers, community and all that may want to understand the possibilities of using plants for a great remediation technique.

2012-2011 Co-Developer, Artist Winter Wonderland: A Defiant Garden Competition by Stevie Famulari

Creation of a garden that defies winter, an innovative idea: a "garden" made of snow that will bring people together to create a magical snow sculpture wonderland that defies the homebound conditions of winter.
